

RICS Cyprus Property Price Index

Q2 2013 – Prices as at 30/06/13

This is the fifteenth publication of RICS Cyprus' Property Price Index, a quarterly price and rental index which is based on methodology produced by the University of Reading, UK. The Index tracks property and rental prices across all districts and main property types.

Introduction & Commentary

During the second quarter of 2013 Cyprus bore the consequences of the decisions of the Eurogroup on 15 and 27 March to "bail-in" the depositors of two of Cyprus' largest banks, to close down Laiki Bank, and to impose capital restrictions. The implications of these decisions were unfolding throughout the quarter, with no bank finance being available and deposits being blocked in bank accounts.

Given prevailing economic conditions and the turbulence in Cyprus' banking system, there was a lack of transactions during the quarter. Local buyers in particular were the most discerning as the increase in unemployment and the worsening prospects of the local economy led to a sharp reduction in interest. Furthermore, those interested were unable to access bank-finance or their deposits.

Market Capital Values

The Property Price Index has recorded significant falls across Cyprus' major urban areas, with prices and rents falling across all districts. Overall, Nicosia and Limassol fared the worst as they were the least affected markets up until the second half of 2012.

Across Cyprus, residential prices for both houses and flats fell by 4.2% and 5.0% respectively, with the biggest drop being in Famagusta (6.7% for flats) and Larnaca (9.2% for houses). Values of retail properties fell by an average of 7.8%, whilst those of offices and warehouses fell by 4.4% and 5.9% respectively.

Compared to Q2 2012, prices dropped by 12.6% for apartments, 11.2% for houses, 23.3% for retail, 13.0% for office, and 14.8% for warehouses.

Market Rental Values

Across Cyprus, rental values decreased by 5.2% for apartments, 5.4% for houses, 12.0% for retail units, 7.1% for warehouses, and 8.8% for offices.

Compared to Q2 2012, rents dropped by 12.0% for apartments, 11.9% for houses, 28.3% for retail, 19.4% for warehouses, and 15.9% for offices.

All asset classes and geographies continue to be affected, with areas that had dropped the most early on in the property cycle now nearing the trough.

Appraisal based initial yields

At the end of Q2 2013 average gross yields stood at 3.8% for apartments, 2.0% for houses, 5.6% for retail, 4.5% for warehouses, and 4.3% for offices. The parallel reduction in capital values and rents is keeping investment yields relatively stable and at very low levels (compared to yields overseas). This suggests that there is still room for re-pricing of capital values to take place.

Quarterly change in average prices

Average price index (All types)

*Q4 2009 = 100, which is the base value of the index

RICS Cyprus Property Price Index

Contributing professional bodies

Profile of the RICS

The RICS – the Royal Institution of Chartered Surveyors – is the largest organisation for professionals in property, land, construction and environmental assets, worldwide. The organisation was created in 1868 and now has over 140,000 members in 146 countries. RICS Europe is based in Brussels and represents 17 national associations, with over 8,150 members in Continental Europe. Visit www.joinricsineurope.eu and www.rics.org for more information.

Profile of ΣΕΕΟΚΚ

The Cyprus Association of Quantity Surveyors and Construction Economists (ΣΕΕΟΚΚ) is the association that represents Chartered Quantity Surveyors and Quantity Surveyors whose main area of work is in Cyprus and they permanently live in Cyprus. Visit www.seeokk.org for more information.

Index parameters and methodology

Methodology

The methodology underpinning the RICS Cyprus Property Price Index was developed by the University of Reading, UK. The report is available on <http://www.joinricsineurope.eu/en/na/view/rics-cyprus>

Coverage and Variables Monitored

The RICS Cyprus Property Price Index monitors the urban centres of Nicosia, Limassol, Larnaca, Paphos and Paralimni-Famagusta. The Index only tracks prices in Republic of Cyprus' government controlled area and not in the occupied North.

In each of these centres, the index monitors the Market Value and Market Rent, as defined in the RICS Red Book, across the four main property sectors – office (CBD), retail (high street), industrial (warehouse) and residential (houses and apartments).

Recognising that there are sub-districts within these urban areas which operate and behave in a varying manner, a number of these is monitored in order to derive the composite index for each category per urban area.

The information provided in this publication is based on the average price and rent of the sub-districts monitored per urban centre per sector. The complete list of these sub-districts can be found in the University of Reading's report which is available on <http://www.joinricsineurope.eu/en/na/view/rics-cyprus>

Nature of Notional Buildings

The RICS Cyprus Property Price Index monitors hypothetical or notional buildings, each having specific characteristics. Details of these hypothetical properties are provided in the University of Reading's report.

The provided price per sqm is based on the Gross External Area of the property (as defined in the RICS' Code of Measurement Practice 6th Edition), which includes the living area and covered verandas but excludes common areas.

Frequency

The index is produced on a quarterly basis.

Monitoring Process

The estimation of price levels is carried out by accredited RICS property professionals who are active in the relevant markets.
