Cyprus Tourism Organisation

# Conference

The Anglo-Hellenic and Cypriot Law Association, founded in 1987, is organizing for the benefit of the people in Cyprus and the European buyers of holiday homes a conference on **Loans in Swiss Francs**, which will be held between 2nd-5th December 2014. The conference will attempt to address the problem of granting loans in Swiss francs to consumers. Thousands of Cypriots and European citizens are trapped in loans granted by banks in Swiss francs.

The conference is organized by **Dr. Katherine Alexander**, a lawyer in England and Wales, as well as in Cyprus, founder of the European Institute in Nicosia, President of the Anglo-Hellenic and Cypriot Law Association, with vast experience in addressing, through legal measures, loans in Swiss francs in the UK and Cyprus.

The purpose of the conference is to provide information to consumers and to promote reforms at a European level through the participation of leading European lawyers as speakers. Speakers will make reference to cases won against foreign currency housing loans and personal loans. Reference will also be made to the adoption of institutional measures that will define the responsibilities of banks towards borrowers.

The conference will be held in English.

Website: [www.european-banking-reform.org/swissfranc.htm](http://www.european-banking-reform.org/swissfranc.htm)

The **European Banking Reform Group** believes that the uncontrolled manner in which banks grant loans has created enormous legal, economic and social problems.

A fair and sensible solution must be found in relation to lending problems and the elimination of foreign currency loans. The Hungarian government officially abolished loans in Swiss francs and foreign currencies. Other governments should adopt this example.
